

SKILLS Ruby, Rails, JavaScript, React/Redux, HTML, CSS, MongoDB, Mongoose, Node.js

PROJECTS

Bestflix | *(React/Redux, Rails 5, AWS, HTML5 Video)*

[live](#) | [github](#)

- Utilized HTML5 Video tags to provide streaming video to the user.
- Leveraged AWS cloud storage to store Rails backend with seed data through Active Record to allow for faster response times.
- Integrated client side requests with AJAX and utilized JSON Jbuilder on backend to format responses and streamline application.

HomeCooked | *(MongoDB, Express, React/Redux, Node.js)*

[live](#) | [github](#)

- Created MongoDB using Mongoose Schema and Node.js to model data.
- Implemented ES6 Javascript async and await to handle asynchronicity and create controllers to provide data from backend to frontend.
- Formulated route paths using Express to respond to HTTP requests from the client side.
- Validated user inputs from frontend using the validator.js library to ensure accurate user information.

Final Battler | *(Vanilla Javascript, HTML5 Canvas, HTML Audio,)*

[live](#) | [github](#)

- Manipulated HTML5 Canvas' ctx.drawImage() and requestAnimationFrame() to build a game background and place character sprites onto the page.
- Formulated battle logic through the use of JS' Math object and setTimeout intervals to handle character and boss interactions.
- Delivered audio that can be toggled on and off using built in HTML Audio's play and pause functions combined with document.getElementById and the use of onClicks to make responsive buttons for the player.
